Elden Ring Features Key:

Featured User Interface for Battle□ Battle in the game is heavily enhanced thanks to the new interface for battle. The game world is displayed in an isometric view, presenting the action from an almost overhead viewpoint.
The Labyrinth System□ The game world is divided into various stages, called "Labyrinths". The Labyrinth is composed of dungeons and routes. After being defeated by the enemy and defeated along the routes, you can return to the entrance of the dungeon. Only after defeating all of the enemies in the dungeon can you reach the next Labyrinth. If you enter a Labyrinth while being defeated, you will not be able to return until the dungeon is cleared.
Player Interaction Enhancements□ Enchanted Marks and Bonds are put in effect at certain points in the game, and the chance of meeting with other people increases depending on where you've been to. This is thought to have been implemented to facilitate an offline offline world.

I just wish there were a few more bosses for a bit more variety. For one, I feel that most of the bosses are similar. As for the gameplay itself, most of the quests feel like pointless minigames such as headbutting an entity or finding a puzzle. Please can someone answer me when I am in a quest where I have to stay in a portal and wait for [SOME CHAT] to reply to me. What is the point of this? No one says anything to me and I just sit there for 15 minutes, do something else and wait for [SOME CHAT] to reply to me. I could of been doing something else instead. My main problem with it is that there is no way to add maps (visible in the new DLC), I need to have my own since there's only 1, and the fact that the character is not directly controlled. Can't comment on the actual game itself (this is still in beta) but the server issues have been fixed. Sorry we had those issues. The game is running smoothly now. Thank you for the feedback. Does the game officially support Window 7/8/10, Mac OS and Linux versions? Yes for the Mac, Linux and Windows(#). There is a beta build for Mac OS which runs on Snow Leopard, it is not 100% and some windows bugs exist but we are working on it. There is a beta release planned for Linux which we will make available once it is ready. You can download the beta Mac OS build here. This is the build currently in release, the final build for linux and windows should be available within a few days. Have a crash in the final version after the update to OSX 10.8.1? Please post a bug report to the website (or submit it through the Feedback form in the application. Can I charge the game with the Japanese MasterCard? I'm afraid that for now you cannot use your Japanese debit or credit card to pay for
