India to step up warships in Arabian Sea The Indian Navy has deployed at least six warships to patrol the Arabian Sea off the coast of Yemen, following recent intelligence reports that al-Qaeda and Iran-backed forces have entered the strife-torn country. In a sign of growing concerns about China's expanding influence in the contested region, the Indian navy has also increased the supply of ammunition to the Yemeni government forces. A senior Indian navy commander told Reuters on Thursday the ships had arrived in the Arabian Sea within the past couple of days. He said the vessels – one warship, one amphibious vessel and four support ships – had taken up a "proximity" surveillance mission in the region. "We have increased our deliveries of ammunition," the official said, declining to give further details about the number of weapons delivered to Yemen. The official did not reveal the exact purpose of the newly deployed warships. However, Prime Minister Narendra Modi has repeatedly lashed out at Pakistan, accusing it of supporting terrorist groups in India and elsewhere. India has repeatedly accused Pakistan of backing Khalifa Haftar, a former colonel in the Libyan army who is now leading a rebellion against the U.N.-recognized government in Tripoli. Haftar has been fighting with rival factions in Libya for some months, and the U.N. Security Council is poised to announce on Friday the deployment of a U.N. peacekeeping force to Libya. The Indian official said the warships would continue to support the Yemen government forces, a role that will likely ramp up as the fighting between Houthi rebels and government forces continues. The U.N. Security Council is due to meet on Friday to discuss the new peacekeeping mission. Meanwhile, India has also joined a United States-led military coalition fighting the Islamic State in Afghanistan, where the U.S. military has been backing the government of Afghan President Ashraf Ghani. India has not publicly disclosed the presence of its warships in the Arabian Sea. But last year, New Delhi said that its navy had sent warships into the Indian Ocean in early February to support an international anti-piracy mission. On Feb. 4, Prime Minister Modi said India had sent warships to the strategic Indian Ocean region to ensure freedom of navigation and ensure security of sea routes. He said this would be done in coordination with international powers. The statement evoked immediate response from Pakistan, which earlier this month had warned of retaliation if a U 595f342e71
