Using RESTFUL API for authentication, I have a project with name "project-1". Now, I want to define my own implementation for auth.UserDetailsService for the current project which is project-1. Can someone please tell me how to do this? I have tried including following dependency in BuildConfig.java, and also in the UserDetailsService class which is overridden. org.springframework.boot spring-boot-starter-security 2.0.5.RELEASE My implementation file is as follows: import org.springframework.beans.factory
